قسم علوم الحاسب
كلية الحاسب

Preface:

As the fields of computer science and information technology continue to evolve rapidly, gaining field experience through summer internship has become a necessity for students to bridge the gap between theoretical and practical knowledges in the labor market. This guide serves as a comprehensive guide for students and faculty within the Department of Computer Science to provide a structured framework for organizing and conducting internship align with the program objectives and labor market expectations for the Computer Science program. It also outlines procedures, policies, and best practices to ensure a successful and beneficial internship experience for Computer Science students on the one hand and the organizations and institutions that provide internships on the other.

TABLE OF CONTENTS

1. Internship Vision and Mission	5
2. Summer Internship Objectives	5
3. Course Learning Outcomes.....	5
1. Knowledge and Understanding.....	5
2. Skills.....	5
3. Values	5
4. Summer Internship Development Cycle	6
5. Key Stakeholders and Their Roles.....	9
5.1 The Trainee Role	10
5.2 The Internship Coordinator Role.....	12
5.3 The Academic supervisor Role.....	13
5.4 The Site supervisor Role.....	14
6. Effectiveness of Training and Assessment	15
6.1 Marks Distribution For CS497.....	16
7. Forms and Templates	16
8. Specification Approval Data	17
