4.3.1 Does your university as a body provide access to educational resources for those not studying at the university? -e.g computers, library, online courses, access to lectures?

The University's Main Facilities

https://hr.qu.edu.sa/laravel-filemanager/files/shares/pdf/Policies/En/15.pdf [1]

The University has many facilities, including but not limited to the following:

- Faculties, including laboratories, workshops, lecture halls and office rooms for university employees, both in the University dorms in Milidah or in the other branches.

- Buildings of senior management and buildings for deanships and departments.

- Library building and branch libraries that provide services to all employees of the university.

- The University Hospital Building, an integral medical facility that is part of the Medical City in the University City in Milidah, which will provide services to University employees and the community members, in addition to the general and specialized medical clinics currently operating, which provide health care services for all university staff including students, faculty and staff.

- A residential city for students with integrated service facilities such as restaurants, prayer rooms, dining rooms, resting and break rooms.

- University housing for faculty members.

- Sports City, which includes a range of facilities and cultural, social and sports facilities implemented using new modern designs and provides a full range of playgrounds and services for employees of the university students and faculty members and staff.

This set includes:

o Bowling hall and recreational games (billiards, baby foot and .....).

o Multiple games gym (football, basketball, volleyball, badminton and ....).

o Services Building (for management, bathrooms, dressing rooms, ……).

o Swimming pool building with public terraces and equipped for tournaments.

o Social building equipped with social rooms and cafeteria.

o A group of outdoor stadiums for playing football, basketball and tennis.

The total area of these facilities is (89800 m2) and it costed 89 million Saudi riyals, and built using the latest models of construction and equipped on a high level to serve the employees of the Qassim University Deanship of Student Affairs.

- Farms of the Faculty of Agriculture and Veterinary Medicine

- Students and faculty restaurants

- Great celebration halls

Rules and Regulations for Using Facilities

https://hr.qu.edu.sa/laravel-filemanager/files/shares/pdf/Policies/En/15.pdf [1]

Rationalization of the use of facilities at the University is organized through a mechanism of several stages, and can be listed as follows:

The First Stage: the stage of examining the applications and making sure that whatever

is requested is not already presence in the university.

The Second Stage: Continuous work to rationalize the use of facilities. The facilities management at the University has an important role in the organization and rationalization of the use of university facilities, in accordance with the functions of the facilities management mentioned above.

With the aim of rationalization and effective use, the university and colleges assign management of their farms, laboratories, medical clinics and sports and cultural facilities to specialized departments, including administrative and technical leaders, in order to rationalize and ensure efficient management and use of all the facilities. The university is also keen to utilize the university facilities such as laboratories and quality halls, etc., to make the best use of these facilities and to disseminate them, and to regulate the use of these facilities and equipment by all university employees and external bodies through agreements that achieve financial return. The university is also guiding the spending process with economic plans to provide equipment through alternatives to the process of procurement such as leasing and implementation of services such as landscaping, cleaning and transport by contracting with specialized companies.

The Third Stage: training the users of the equipment in order to achieve the maximum benefit from this equipment. The University concludes all contracts for supplying equipment, on a condition that the supplier will provide training sessions on how to use and operate the equipment to those who will be using the equipment in the university.

In addition to the above requirements obligated on the suppliers for providing training on their equipment, the academic sequence system enables colleges to arrange for the experienced professors to convey their expertise and train the staff assisting faculty members and new faculty members on the use of equipment from laboratories and others, through lectures and joint classroom activities.

The University shall establish regulations for the use of facilities, including:

• Some facilities are limited to the use of some university employees.

• Some utilities use time controls.

• Some facilities are used with financial controls.

• Some facilities are available to all university staff

Deanship of E-Learning

https://el.qu.edu.sa/content/p/58 [2]

Responsibilities

1. To directly supervise the work of the incoming and issued.
2. Regulating the procedures for receiving, restricting, and registering all transactions, documents, correspondence, mailing materials, publications, registration and electronic registration of all transactions received and delivered to the Dean, taking care not to break up their confidentiality and confidentiality, and then presenting them to the Dean's Excellency for information, and then directing them to the departments concerned with public administration according to jurisdiction.
3. Receive, export and send all transactions, correspondence and letters issued by the relevant departments of the university, export them and send them to the university's stakeholders, as well as organize follow-up procedures with the relevant departments periodically, in order to be able to respond to any inquiry.
4. Organizing the delivery and dispatch of transactions, correspondence, communications and all postal materials to the relevant authorities inside and outside the university, in coordination with the reporter and driver of the deanship, as well as organizing the transmission procedures through various electronic channels such as fax and e-mail.
5. Indexing, preserving, and documenting all documents, transactions and correspondence received and issued to and from the deanship, as well as periodicals, publications and other postal materials, in accordance with a system that is easy to return to when needed.

Library Deanship

Vision

A nationally distinguished pillar in supporting education, scientific research and serving the Qassim community.

Deanship Message

The Deanship seeks to provide a variety of and sophisticated sources of information that meet the needs of the beneficiaries in accordance with the requirements of the times and develop the educational and research performance of the university and in line with its outstanding role in the service of the community.

Deanship Values

In light of the commitment to the universal values of Qassim University, the Deanship of Libraries believes in the following values:

Knowledge: Contributes to building a knowledge society.

Quality: We adhere to quality standards in performance and service delivery.

Creativity: We believe in providing an environment that supports innovation and continuous development.

Communication: We communicate efficiently with all our partners.

Integration: We promote integration in all our activities and businesses.

Goals

Achieving excellence in the service of the educational process and scientific research.

Strengthening the role of deanship in the service of society.

Update the sources of paper information.

4- Developing databases, INFORMATION technology and digital sources.

Improving the attractiveness of the library to increase the frequency rates of beneficiaries.

6- Raising the efficiency of the equipment and improving the services of the site and infrastructure.

Developing the service delivery mechanism.

Raising the efficiency, satisfaction and retention of human resources, developing administrative performance and increasing financial resources.

A telephone guide for the dean of libraries

For the callers from outside the university call the university phone and then enter the required transfer number

Or wait for the central sheriff's help.

Al-Imada's live phone: fax 00966163801307: 00966163801339

Lending and beneficiary services section

Lending is defined as the process of recording sources of information for use outside the library or information center for a specified period of time, and lending is one of the most important services provided by libraries to the beneficiaries, and by which the effectiveness of the library is measured and often supervised by an employee who records the material before taking it out to the borrower and confirming it in the event of return it by the beneficiary, and thus follows the self-automated lending service so that the user can register books or renew the loan himself without referring to the competent employee in the library.

Loan and beneficiary service functions

1- Taking out the loaned material requested by the beneficiary outside the library to read it at his home or elsewhere.

2- Renewal of borrowed materials that have expired and are still needed by the raging, usually allows the deanship to renew the book itself once, and the renewal service can be done via the Internet.

3- Book books when they are returned to some beneficiaries who are in urgent need of them.

4- Follow up on the delayed materials and remind the those who are hired to do so by contacting them by telephone.

5- Respond to the inquiries of visitors to the library from students and researchers by telephone or when visiting directly.

6- Printing extracts from automated indexes from the library database.

7- Introducing the beneficiaries to the best way to search the automated indexes.

8- Introducing new students to the facilities of the Central Library and the special regulations and regulations and services provided by the library.

Indexing and classification section

The aim of indexing is to try to control human knowledge and present it in a prescribed and orderly manner to scholars and researchers so that it can be used.

The indexing department performs the technical procedures of the information vessels acquired by the library, from the indexing, classification and automatic recording of vessels. Using dewey decimal classification system, Anglo-American indexing rules.

Department of University Letters and Manuscripts

This section seeks to develop university letters and manuscripts at the university **in order to facilitate the researchers faculty, graduate students and the public community what they need in this regard, as well as to trace manuscripts and documents located in the region and deposit them in the university**, the number of university letters available in the section amounted to about (1600) messages on CD discs in Arabic and about (400) scientific messages in English and the number of original manuscripts 40 and about (3000) pictorial manuscripts and obtained (20) photo documents From local documents.

With the participation of more than 600 students from inside and outside the university. The University Organizes the "Ninth Internship Course" for Medical Students over 3 Days

https://www.qu.edu.sa/content/news/2710 [10]

The university, represented by the College of Medicine, organizes the ninth internship course for medical students, which began on Thursday, 30/7/1443 AH, and will continue for three days at the outpatient theater, in the presence of a group of doctors at the university, and more than 600 students from inside and outside the university participate in person and remotely in the activities of the course.

This course aims to prepare medical students for the labor market environment, introduce them to the available specialties, help them choose a specialty, provide them with the professional skills necessary to enter a healthy work environment, and enlighten them about the modern requirements of the Health Specialties Authority.

For his part, Dr. Faisal Al-Muhaileb, Dean of the College of Medicine at Qassim University, explained that the college seeks to crystallize the Kingdom's vision based on combining tradition and modernity by providing students with the scientific and knowledge basis, and scientific and practical skills with regard to medical sciences, spreading knowledge and spreading health awareness, by focusing on courses that allow graduates in medical specialties to clearly define their path and equip them for the labor market and provide them with professional skills to enter the healthy environment, explaining that for this purpose such courses are held that Held by the College in its ninth session.

Al-Muhileb added that the College of Medicine at Qassim University is one of the leading and distinguished medical colleges in the field of medicine and medical education in the Kingdom of Saudi Arabia, and since the start of its medical career until this day, it is witnessing a dynamic movement to launch for the better in embodying the university's strategy, building community partnership, building a comprehensive quality system, and achieving academic accreditation, in order to reach excellence

and reach global leadership, pointing out that the college seeks to develop the skills and capabilities of its graduates to be an addition to the labor market and the health field in Saudi Arabia.

The University Launches the Fourth Summer Club Events and Activities Virtually
https://www.qu.edu.sa/content/news/2575 [11]

The university, represented by the Deanship of Student Affairs, launched the programs and activities of the fourth summer club, which is held virtually, and lasts for five weeks remotely with the participation of male and female students of all educational levels (primary, intermediate, secondary, and university), where the club's activities aim to achieve the maximum benefit for students and use the summer vacation time with useful and recreational programs and increase digital learning.

The activities of the summer club vary to include six tracks: the skill track, which aims to develop the participants' skills in calligraphy, drawing, photography and some manual skills, the educational track, which aims to add educational experiences to the participants, the technical track, which aims to provide participants with the basics of programming and application making, in addition to the entertainment track, which contains recreational programs and games offered to the club's participants, as well as the competitions track such as the club's general competitions, the "Who is the Martyr" competition, the major cultural competition, as well as the general programs track. Which targets club participants and others.

For his part, the Dean of Student Affairs and Executive Director of the Summer Club, Dr. Muhammad Al-Ajlan, confirmed that the number of registered male and female students in the club is witnessing a significant increase day by day, adding that the work system within the club is divided into a number of groups, each group has a supervisor and a trainer who move between several programs daily accompanied by members, and in at least three rooms through distance learning programs, where activities are divided between young men and women according to ages.

Al-Ajlan explained that the university's belief in its societal role towards activating the energies of all youth groups, whether male or female, resulted in investing these energies during the summer vacation, wishing success and success to the club's members and that its activities and programs would benefit those registered in it from all levels of education.

The University's Veterinary Hospital holds a training course in cooperation with the Camel Club to "Detect Tamper"
https://www.qu.edu.sa/content/news/2592 [12]

To complement the fruitful cooperation between the two sides, the university, represented by the University Veterinary Hospital, in cooperation with the Camel Club, is organizing a training course to detect tampering with camels over a full month, starting from the first of Muharram 1443 AH, at the headquarters of the University Veterinary Hospital in order to raise the efficiency of veterinarians about the different methods in camels and methods of detecting them outwardly and using clinically and laboratory-advanced devices.

For his part, Dr. Abdullah Al-Hawas, Director of the Veterinary Hospital at the University, confirmed that the participants in this course are expected to acquire the ability to familiarize themselves with the different methods used to tamper with camels and different injection places, and they will also have the ability to evaluate them and identify infectious diseases that are similar to tampering with tampering and how to differentiate between them.

Al-Hawas added that the trainee will also learn about the negative effects of hormonal injections and how to detect them, as well as familiarity with how ultrasound works and how to use them in examining healthy tissue and detecting tampering in camels, in addition to learning about the way the thermal camera works, the work of the X-ray machine, and laboratory devices.

The University Holds a Training Course to Raise the Efficiency of Veterinarians in Detecting Tampering in Cooperation with the Camel Club

https://www.qu.edu.sa/content/news/2595 [13]

The university, represented by the University Veterinary Hospital, in cooperation with the Camel Club, launched yesterday, Monday, 1/1/1443 AH, the training course to detect tampering with camels, which lasts for a whole month at the hospital's headquarters, where a number of trainees from different regions of the Kingdom benefit from this course.

This training course aims to raise the efficiency of veterinarians about the different methods of tampering with camels and methods of detecting them outwardly and using clinically and laboratory-advanced devices, as the course discusses several axes, including: the concept of tampering, types of tampering, and objective changes "injection, surgical and mechanical intervention".

Veterinarians are also trained to detect tampering and know the types, methods and methods by which it is done in order to qualify qualified medical cadres to carry out this task to the fullest through the use of modern technology in detecting those practices carried out by some camel owners out of material greed that is incompatible with religion and human ethics, and the trainee is expected after this course to be familiar with these different methods of tampering theoretically and scientifically and is evaluated at the end of the course theoretically and practically.

For his part, the Director of the University Veterinary Hospital, Dr. Abdullah Al-Hawas, explained that this course, which is held in cooperation with the Camel Club and the Department of Veterinary Medicine at the College of Agriculture and Veterinary Medicine at the university, comes within the

framework of the interest of our wise leadership, represented by the Custodian of the Two Holy Mosques King Salman bin Abdulaziz, and His Highness Crown Prince Mohammed bin Salman, in raising the efficiency of the sectors responsible for the advancement of this country and combating corruption of all kinds, praising the efforts made by the university represented by His Excellency Prof. Dr. Abdulrahman bin Hamad Al-Dawood. The President of the University and the Vice Rectors of the University to raise the efficiency of medical and other cadres by holding conferences, training courses and workshops in various disciplines.

Al-Hawas added that thanks are extended to Sheikh Fahd Al-Hathlin, Chairman of the Board of Directors of the Camel Club and President of the International Camel Organization, for his interest and the effort and interest in this heritage and national wealth in the past and present by supporting scientific research and chairs dedicated to research in various sectors related to this great creature and the establishment of camel festivals, taking into account justice, integrity and distance from tampering, and this is reflected in the establishment of such a course to combat tampering in order to achieve justice and integrity in the King Abdulaziz Camel Festivals.

Deputy Governor of Qassim congratulates the university for achieving first place in the competition of the International Week of Open Education

https://www.qu.edu.sa/content/news/2939 [14]

His Royal Highness Prince Fahd bin Turki bin Faisal bin Turki bin Abdulaziz, Deputy Governor of Qassim Region, congratulated His Excellency Prof. Dr. Abdul Rahman bin Hamad Al-Dawood, President of Qassim University, on the occasion of the university's achievement of first place in the International Open Learning Week competition, among more than 80 governmental, private and non-profit agencies in the Kingdom that participated in the competition supervised by the National E-Learning Center.

In his speech, His Highness said: "I am pleased with what the university has achieved by winning first place in the International Open Learning Week competition among many government and private agencies in the Kingdom that participated in this competition, wishing you and those in charge of the university more success and success."

The University Participates in the Qassim Book Fair with a Number of Its Publications

https://www.qu.edu.sa/content/news/2868 [15]

The university, represented by the Deanship of Library Affairs, participates in a pavilion in the Qassim Book Fair in its fourth edition, at the King Khalid Cultural Center in Buraidah, with a number of university publications of scientific books and refereed journals, through 180 titles of a scientific book and 9 titles of refereed journals.

The university's pavilion receives its visitors with samples of special books in various fields, which are displayed in 33 libraries distributed in the faculties of the university, most

notably, Prince Faisal bin Mishaal bin Saud bin Abdulaziz Library, where Qassim University, represented by the Deanship of Library Affairs, preserves, takes care of them and makes them available to researchers.

These libraries cover cultural, literary and scientific figures and sources of knowledge in various sciences, arts and disciplines, documenting the stages of development of the scientific and cultural movement at Qassim University since its establishment, until our prosperous era.

[Excellency the President of the University inaugurates the electronic library services on the "Blackboard" system](https://www.qu.edu.sa/content/news/1105)

https://www.qu.edu.sa/content/news/1105 [27]

His Excellency Prof. Dr. Abdul Rahman bin Hamad Al-Daoud, President of the University, launched the electronic library services on the e-learning management system "Blackboard", on Tuesday 2/5/1440 AH in the meeting hall of his office in the university city in Al-Mulida, where this project was implemented in cooperation between the two deanships of e-learning. and library affairs. Dr. Sattam Al-Otaibi, Dean of Library Affairs, spoke about the project, explaining that the software was designed to compile the electronic services provided by the Deanship of Library Affairs on one page, to be integrated into the Blackboard platform under the name "Electronic Library", from which the beneficiary can access all the Deanship's electronic services. Through the icons that refer directly to the requested service; These services are: the university libraries index, electronic databases, electronic documentation sites and programs, scientific citations detection service, and ISI scientific journal classification service.

[The University introduces visitors to the contents of its paper and electronic library at the Qassim Book Fair](https://www.qu.edu.sa/content/news/1110)

https://www.qu.edu.sa/content/news/1110 [28]

The university participated in the second Qassim Book Fair held at the International Exhibition and Conference Center with a pavilion that introduces visitors to the exhibition with the contents of the university library from paper and electronic sources of information.

The number of books in the university library is estimated at 553,586 titles, while the number of periodicals and volumes is 14,110, in addition to 2834 university theses and 25 rare manuscripts. , and 1,824,480 university emails.

More than 19 thousand students attend "remote" studies in the summer

https://www.qu.edu.sa/content/news/1826 [29]

University students from various faculties are organized to study "remotely" on the first day of the summer semester (413), as the statistics on Sunday, May 31, 2020 AD, revealed that 19,135 male and female students entered virtual classes, while the number of files reviewed reached 401 files. In addition to 2,060 evaluations, 453 discussion boards were set up.

The university harnesses all its capabilities to make the e-learning system successful within a year since the suspension of studies

https://www.qu.edu.sa/content/news/2531 [30]

During the year since the suspension of studies and the complete transformation to the e-learning system, the university has harnessed all its capabilities to ensure the success of this experiment and to produce the highest level of educational return through this system. General to (7767169) users, and the number of virtual classes provided through the system reached (1301982) virtual classes,

The Kingdom has proven, after a full year of distance education, that it has written a unique success story with the support of its wise leadership - may God grant him success - in addressing the challenges of the pandemic and the continuation of the educational process since the first day of suspending attendance for study and switching to simultaneous attendance from a distance.
