

### 4.3.3 Does your university as a body host events at university that are open to the general public: executive education programmes (this refers to short courses for people who are not attending the university; this specifically excludes courses like MBA) and/or vocational training?

#### The University Launches the Fourth Summer Club Events and Activities Virtually

<https://www.qu.edu.sa/content/news/2575> [1]

The university, represented by the Deanship of Student Affairs, launched the programs and activities of the fourth summer club, which is held virtually, and lasts for five weeks remotely with the participation of male and female students of all educational levels (primary, intermediate, secondary, and university), where the club's activities aim to achieve the maximum benefit for students and use the summer vacation time with useful and recreational programs and increase digital learning.

The activities of the summer club vary to include six tracks: the skill track, which aims to develop the participants' skills in calligraphy, drawing, photography and some manual skills, the educational track, which aims to add educational experiences to the participants, the technical track, which aims to provide participants with the basics of programming and application making, in addition to the entertainment track, which contains recreational programs and games offered to the club's participants, as well as the competitions track such as the club's general competitions, the "Who is the Martyr" competition, the major cultural competition, as well as the general programs track. Which targets club participants and others.

For his part, the Dean of Student Affairs and Executive Director of the Summer Club, Dr. Muhammad Al-Ajlan, confirmed that the number of registered male and female students in the club is witnessing a significant increase day by day, adding that the work system within the club is divided into a number of groups, each group has a supervisor and a trainer who move between several programs daily accompanied by members, and in at least three rooms through distance learning programs, where activities are divided between young men and women according to ages.

Al-Ajlan explained that the university's belief in its societal role towards activating the energies of all youth groups, whether male or female, resulted in investing these energies during the summer vacation, wishing success and success to the club's members and that its activities and programs would benefit those registered in it from all levels of education.

## The University's Veterinary Hospital holds a training course in cooperation with the Camel Club to "Detect Tamper"

<https://www.qu.edu.sa/content/news/2592> [2]

To complement the fruitful cooperation between the two sides, the university, represented by the University Veterinary Hospital, in cooperation with the Camel Club, is organizing a training course to detect tampering with camels over a full month, starting from the first of Muharram 1443 AH, at the headquarters of the University Veterinary Hospital in order to raise the efficiency of veterinarians about the different methods in camels and methods of detecting them outwardly and using clinically and laboratory-advanced devices.

For his part, Dr. Abdullah Al-Hawas, Director of the Veterinary Hospital at the University, confirmed that the participants in this course are expected to acquire the ability to familiarize themselves with the different methods used to tamper with camels and different injection places, and they will also have the ability to evaluate them and identify infectious diseases that are similar to tampering with tampering and how to differentiate between them.

Al-Hawas added that the trainee will also learn about the negative effects of hormonal injections and how to detect them, as well as familiarity with how ultrasound works and how to use them in examining healthy tissue and detecting tampering in camels, in addition to learning about the way the thermal camera works, the work of the X-ray machine, and laboratory devices.

## The University Holds a Training Course to Raise the Efficiency of Veterinarians in Detecting Tampering in Cooperation with the Camel Club

<https://www.qu.edu.sa/content/news/2595> [3]

The university, represented by the University Veterinary Hospital, in cooperation with the Camel Club, launched yesterday, Monday, 1/1/1443 AH, the training course to detect tampering with camels, which lasts for a whole month at the hospital's headquarters, where a number of trainees from different regions of the Kingdom benefit from this course.

This training course aims to raise the efficiency of veterinarians about the different methods of tampering with camels and methods of detecting them outwardly and using clinically and laboratory-advanced devices, as the course discusses several axes, including: the concept of tampering, types of tampering, and objective changes "injection, surgical and mechanical intervention".

Veterinarians are also trained to detect tampering and know the types, methods and methods by which it is done in order to qualify qualified medical cadres to carry out this task to the fullest through the use of modern technology in detecting those practices carried out by some camel owners out of material greed that is incompatible with religion and human ethics, and the trainee is expected after this course to be familiar with these different methods of tampering theoretically and scientifically and is evaluated at the end of the course theoretically and practically.

For his part, the Director of the University Veterinary Hospital, Dr. Abdullah Al-Hawas, explained that this course, which is held in cooperation with the Camel Club and the Department of Veterinary Medicine at the College of Agriculture and Veterinary Medicine at the university, comes within the framework of the interest of our wise leadership, represented by the Custodian of the Two Holy Mosques King Salman bin Abdulaziz, and His Highness Crown Prince Mohammed bin Salman, in raising the efficiency of the sectors responsible for the advancement of this country and combating corruption of all kinds, praising the efforts made by the university represented by His Excellency Prof. Dr. Abdulrahman bin Hamad Al-Dawood. The President of the University and the Vice Rectors of the University to raise the efficiency of medical and other cadres by holding conferences, training courses and workshops in various disciplines.

Al-Hawas added that thanks are extended to Sheikh Fahd Al-Hathlin, Chairman of the Board of Directors of the Camel Club and President of the International Camel Organization, for his interest and the effort and interest in this heritage and national wealth in the past and present by supporting scientific research and chairs dedicated to research in various sectors related to this great creature and the establishment of camel festivals, taking into account justice, integrity and distance from tampering, and this is reflected in the establishment of such a course to combat tampering in order to achieve justice and integrity in the King Abdulaziz Camel Festivals.

## The University Concludes the Activities of the Technical Career Day in Cooperation with the Ministry of Communications and Information Technology

<https://www.qu.edu.sa/content/news/2917> [4]

His Excellency Prof. Dr. Abdulrahman bin Hamad Al-Dawood, President of Qassim University, stressed that the Technical Career Day contributes to facilitating the task of the university's graduates to reach job opportunities, and undoubtedly serves them at the level of their working lives and also serves the parties that attract such competencies.

This came during the ceremony honoring the participating parties at the end of the Technical Career Day, which was held by the university in partnership with the Ministry of Communications and Information Technology for two days, at the main headquarters in the university city, with the

participation of more than 40 entities and contained 6 guidance sessions and 8 workshops for the participants in the forum.

Al-Daoud praised the initiative of the College of Computer Science at the university in implementing this technology and holding such an event with the support of the Ministry of Communications and Information Technology and in coordination with companies and institutions, expressing his happiness to meet with the university's partners to contribute to the development of this dear country and achieve the vision of the Kingdom 2030, explaining that the establishment of such events and exhibitions has a major role in contributing to advancing the development of our beloved Kingdom.

Al-Dawood revealed that the university will be held with other companies and institutions in fields other than the field of technology, which will be an opportunity for everyone to obtain a job through which it contributes and participates in the development of the country, thanking our wise government that supports the university with all its activities and programs, and His Royal Highness Prince Dr. Faisal bin Mishaal bin Saud bin Abdulaziz, Governor of the region, for his patronage and opening of this activator and his support for all university programs, and His Highness the Deputy Governor of the region, and His Excellency the Minister of Communications and Information Technology, who honored us By attending this occasion with His Excellency the MP, and thanks to the organizers of this event, the honorable attendees, and all the companies and institutions that participated in the Technical Career Day and contributed to providing job opportunities commensurate with the capabilities and experiences of our sons and daughters.

The Technical Career Day aims to introduce the participating companies, offer job opportunities and conduct personal interviews, as an extension of the keenness of the university and the Ministry to empower national cadres, and contribute to bridging the gap between supply and demand according to the requirements of the labor market with the participation of employment partners in the private and public sectors, to benefit from the support provided by the university and the Future Skills Initiative of the Ministry of Communications and Information Technology to meet their needs in digital jobs.

## Tomorrow is Friday. The Faculty of Medicine at the University Holds the "Sixth Internship Course"

<https://www.qu.edu.sa/content/news/1179> [5]

The "sixth internship course", organized by the Faculty of Medicine at the university, will start tomorrow afternoon, Friday, over two days at the headquarters of the clinics in the university city, where the course includes 10 lectures and 19 workshops with the participation of students of medical colleges in Saudi universities.

The course aims to provide an integrated picture for graduates of the College of Medicine to draw their career and training future in the internship year, and helps them choose the appropriate specialization for them by benefiting from lectures and workshops presented by a group of distinguished doctors, each in his specialty, and targets medical students in all colleges of the Kingdom.

The course includes workshops on neurosurgery, ear, nose, throat and neck surgery, ophthalmology, pediatrics, radiology, emergency medicine, dermatology, anesthesia, general surgery, pediatric

surgery, pediatric neurology, internal medicine, obstetrics and gynecology, family medicine, orthopedics, neurology, psychiatry, urology, and cardiac surgery.

The lectures also discuss a number of topics, most notably: the difference between the academic and clinical track, how to plan for the internship year, the role of the intern doctor, common mistakes in internship, the Saudi license test for health specialties, in addition to CVs and personal interviews, general discussions of surgery, internal medicine, and choosing a medical and surgical specialty.

## 2797 beneficiaries benefited from it. The University Concludes Training Courses for Leaders of Government Departments and Employees in the Region

<https://www.qu.edu.sa/content/news/2697> [6]

The University, represented by the Deanship of Community Service, in cooperation with the Intellectual Awareness Unit at the University, concluded on Thursday 9/7/1443 AH, the activities of training courses for leaders of government departments and their employees in the region, which were held under the patronage of His Royal Highness Prince Dr. Faisal bin Mishaal bin Saud bin Abdulaziz, Governor of Qassim Region, and benefited 2797 beneficiaries, as part of the university's initiative programs to activate His Highness's campaign "I am a Saudi proud of my identity".

The program targeted the leaders of government departments and their employees in the Qassim region, with the aim of contributing to the consolidation of the correct legal concepts and the manifestation of the suspicions of those who invalidate the texts of the two revelations, as well as spreading the correct national intellectual awareness, raising the readiness of intellectual security, preserving security and national gains and rallying around our rulers.

The program also aimed to raise awareness of the methods of misguided ideologues in pitting against the ruler and attempts to deceive young people under several names that are alien to Saudi society, in addition to exposing organized smear campaigns that emanate from abroad and target the internal structure, especially the Saudi citizen.

The program included a training course entitled "The Origins of Stability (Manifestations, Causes, Effects)", which was presented by His Eminence Dr. Khalid bin Abdulaziz Aba Al-Khail, Dean of the College of Sharia and Islamic Studies, on Sunday 5/7/1443 AH, and aimed to clarify the most important factors that support stability in countries, and their impact on societies, peoples and individuals, and about 433 beneficiaries from various employees of government departments in the region benefited from this course, in addition to the course "Information Crimes", presented by Dr. Younis bin Ahmed Al-Mushaiqih, a faculty member at the College of Sharia, on Monday 6/7/1443 AH, during which he reviewed the role of the system in protecting society and the individual from the wrong use of freedoms with regard to publishing and perception related to others, and the

number of beneficiaries of this session reached about 854 beneficiaries from various employees of government departments in Qassim region.

The program also included a course entitled "The Saudi Personality (Foundations and Principles)", presented by Dr. Suleiman bin Muhammad Al-Atni, Vice Dean of the College of Arabic Language and Social Studies, on Tuesday 7/7/1443 AH, with the aim of introducing the Saudi personality and its special nature, and the various factors that affected its construction, and 745 beneficiaries from various employees of government departments in the Qassim region benefited from this course, in addition to a training course entitled "Sharia Mandate (Entitlements and Effects)", presented by Prof. Dr. Khalid bin Saad Al-Matrafi, a faculty member at the College of Sharia and Islamic Studies, on Wednesday 8/7/1443 AH, where this course aimed to introduce the correction of the concept of legal guardianship in the minds of some intellectually reprehensible, and the number of beneficiaries reached about 765 beneficiaries from various employees of government departments in the Qassim region.

## It lasts for 4 months as part of launchKSA. University hosts "Toyq 1000" camp

<https://qu.edu.sa/content/news/2640> [12]

The University, represented by the Office of Graduate Affairs and Professional Development, in collaboration with the Human Resources Deanship Agency for Professional Development, will host the "Toyq 1000" camp, one of the largest technical camps, on Sunday, 4/3/1443 H, as part of launchksa, launched by the Saudi CyberSecurity, Programming and Drons Federation and lasting four months as the largest technical launch in the Middle East.

The university's hosting of the Twaiq 1000 camp comes from its national role and academic, educational and community mission to rehabilitate the country's youth and provide them with the necessary skills and capabilities, as well as as an advanced step to invest human minds from the energies of young men and women to advance the country globally and achieve the goals of Saudi Arabia Vision 2030.

The camp, which will be hosted by the University and will last for 3 months and end with recruitment, aims to qualify the young competencies and cadres of graduates and graduates of computer science colleges in Qassim region in the latest technical fields, where students will be trained in advanced technologies in programming and artificial intelligence by experts in the Saudi Federation of CyberSecurity, Programming and Drons, in cooperation with Google.

## [The Deanship of Scientific Research launches a training program in partnership with Nature Masterclass](https://med.qu.edu.sa/content/news/163)

<https://med.qu.edu.sa/content/news/163> [13]

### **To all QUMED respected staffs and students**

To improve the quality of research projects and scientific papers published in the University, and enhance the scope of research publication in internationally refereed journals with high impact factor, we are pleased to inform you that the Deanship of Scientific Research is providing access to an important online training program (Online Nature Masterclass) for all QU staffers and students.

-Registration for this program by the [official university e-mail ID \(example@qu.edu.sa\)](mailto:example@qu.edu.sa) through the following link:
