

4.3.4 Does your university as a body undertake educational outreach activities (e.g. tailored lectures or demonstrations) beyond campus – e.g. in local schools, in the community, including voluntary student-run schemes?

His Excellency the President of the University sponsors the "Sports Achievement Makers" ceremony and honors the university's teams and students

<https://www.qu.edu.sa/content/news/2975> [1]

The University, represented by the Deanship of Student Affairs, held a ceremony for the makers of sports achievement, under the patronage of His Excellency Prof. Dr. Abdulrahman bin Hamad Al-Dawood, President of the University, and in the presence of His Excellency the Vice President of the University, Dr. Muhammad bin Abdulrahman Al-Saawi, His Excellency the Vice President for Educational Affairs, Dr. Muhammad bin Fahd Al-Sharekh, and a number of deans of colleges and university students. This celebration aimed to honor the students and teams that achieved 17 sports achievements for the university during this year, and who received many sports cups that reflect the will and determination of the university's sports teams in achieving excellence and excellence at the national and Gulf levels that the university obtained, namely: the third place cup for the Saudi Universities Sports Federation Volleyball Championship in its thirteenth season, and the third place cup for the Saudi Universities Sports Federation Championship for the cross-country championship "female students" in its third season. The university also won the third place cup for the Saudi Universities Sports Federation Goalball Championship in its thirteenth season, the third place cup for the Saudi Universities Sports Federation Championship for the cross-country championship in its thirteenth season, the third place volleyball cup in the ninth sports session for universities and higher education institutions in the Gulf Cooperation Council countries, and the first place cup for the Saudi Universities Sports Federation Football Championship in its thirteenth season. For his part, His Excellency the President of the University said in his speech before the ceremony: Today we celebrate and are happy with the university's sports achievements that honored us in the university, the region and higher education, which came after the success of God Almighty, and then with the unlimited

support we receive from our wise government - may God protect it - and from His Highness the Emir of the region and his deputy, who had a role in what the university has accomplished not only at the sports level, but at various other levels, praising as well the efforts of the Dean of the Deanship of Student Affairs, agents and directors of various activities. And the departments in the Deanship, who promised at the beginning of the year that the year 1444 AH will be a different year, and they have thankfully fulfilled their promise and achieved several local and regional achievements. Al-Daoud also expressed his thanks to the students, saying: You are the makers of achievement from sons and daughters, all thanks and appreciation to you, and today we vary in these centers, and God willing, in the next competitions, we will have achieved higher than what we have achieved today, and this is not far from men and girls who worked hard and diligently, and I also do not forget to thank colleagues and deans of the colleges to which these students who have achieved these achievements belong, as their cooperation with the Deanship of Student Affairs, their interaction and appreciation had a role. He added: I am proud to be one of this team that presents this historical achievement that is recorded in the history of the university's achievements, and we hear and read about the university achievement and this is thanks to God, and then with the support of our wise government and His Highness the Emir of the region and his deputy and your efforts all thank you again and again. His Excellency the President of the University honored the employees of the Deanship of Student Affairs who exerted their efforts to serve the student and the university, and the winners of the university's colleges league, in which 22 colleges participated and more than 440 students participated, were honored, and the first place was achieved in the college league of the College of Science and Arts team in Al-Rass, and the second place was won by the team of the College of Arabic Language and Social Studies, and His Excellency honored the recipients of university teams for individual games, and university teams for team games.

The University Participates in the Festival of Talent and Innovation at the Celebration Center in Al-Badaea Governorate

<https://www.qu.edu.sa/content/news/2971> [2]

The university, represented by the College of Science and Arts in Al-Bada'i, participates in the Festival of Talent and Innovation, which will be held during the period from 27 Shawwal to 2 Dhu al-Qi'dah 1444 AH, at the Celebrations Center in Al-Bada'i Governorate, with the participation of a number of students and employees of the college in light of its competencies and experiences.

For her part, Dr. Hanan bint Ghaleb Al-Mutairi, Dean of the College of Science and Arts in Al-Bada'i, explained that this participation comes from the college's keenness to activate its constructive community activities in line with the university's vision and mission towards society and community partnership, and the participation also aims to highlight the most important applications and digital platforms used in education, research and innovation, and to highlight the university's efforts and achievements in the field of using technology and digital transformation, as well as showcasing the talents and innovations of the college's scientific students.

Al-Mutairi added that the college's corner participating in the festival includes various participations, visual presentations, innovative images and models, scientific projects and digital publications covering many topics in several fields.

It is noteworthy that the festival, which is organized by the Education Office in the governorate, includes exhibitions for government agencies and the private sector and exhibitions for education, talent and innovation, as the festival targets visitors from all segments of society.

The University Launches the "Health, Awareness and Education" Campaign in its Fourth Edition at Dome Center

<https://www.qu.edu.sa/content/news/2965> [3]

Today, Sunday, the programs and events of the university's campaign "Health, Awareness and Education" in its fourth edition were launched at the Qubba Center in Al-Asyiah Governorate, under the patronage of His Royal Highness Prince Dr. Faisal bin Mishaal bin Saud bin Abdulaziz, Governor of Qassim Region, and with the support and follow-up of His Excellency Prof. Dr. Abdulrahman bin Hamad Al-Dawood, President of the University, where the campaign is based in the celebration center in the Qubba Center, 150 km from the university's main headquarters.

This comprehensive qualitative campaign stems from the university's leading role in the field of social responsibility, as the university aims to contribute to instilling positive concepts, belonging to the homeland and serving it, and to protect young people from the paths of extremism, deviant ideas and wrong behaviors, as well as to support the quality of life through medical programs, health and psychological awareness, and to raise the level of personal skills and self-abilities to support educational and cognitive achievement.

For his part, Prof. Dr. Ahmed bin Ibrahim Al-Turki, Chairman of the Executive Committee of the campaign, explained that the university began preparing for this campaign 6 months ago by forming more than 14 committees, including the organizational, scientific and executive committees, which specialized in preparing all the various programs and events required by the campaign, as well as equipping the headquarters of its implementation, preparing training halls, equipping the housing of the teams implementing the programs, subsistence them, preparing publications and media coverage, and a women's committee specialized in women's programs was formed and followed up on their implementation.

He added that more than sixty members of the university's employees organized in these committees, and worked with all seriousness to accomplish the tasks assigned to them, pointing out that the number of implementers of the campaign's programs and events has reached six hundred university employees, students and students, and the number of programs and events exceeded 240 programs and events, which are implemented at the campaign's headquarters and in a number of schools, mosques and government departments in and around the Qubba Center.

Al-Turki said that the programs that will be presented throughout the days of the campaign vary between the legitimate programs, which amounted to (57 programs), educational (26 programs), as well as medical clinics (37 programs), oral health and dentistry and counting (32 programs), health and nutrition awareness (21 programs), training and skill courses (14 programs), in addition to laboratory programs, visual and radiological examination and physiotherapy, which totaled 46 programs.

Al-Turki also pointed out that sports and entertainment will have a large share among these programs, as well as the campaign allocated a wing to educate young people about the dangers of drugs and harmful chemical compounds such as Al-Shabo and others, in addition to organizing a veterinary convoy to examine and treat livestock in the Qubba Center implemented by qualified veterinary consultants from the university, the campaign programs start from the morning and continue until the evening for five continuous days to serve the people of the Qubba Center and its surroundings, who number more than twenty thousand people.

The University Participates in the Global Exhibition for Higher Education «GEDEX» in the Sultanate of Oman

<https://www.qu.edu.sa/content/news/2934> [4]

The university participates in the Global Higher Education Exhibition "GEDEX" in the Sultanate of Oman in its twenty-second edition, through a pavilion to introduce the university and its educational and research programs, in addition to the participation of a number of university students in the exhibition held for three days during the period from April 30 to May 2, at the Oman Convention and Exhibition Center in Muscat, under the patronage of Prof. Dr. Rahma bint Ibrahim Al-Mahrouqi, Minister of Higher Education,

Scientific Research and Innovation in Oman, and with the participation of more than 100 universities and international educational institutions.

The university's pavilion participating in the exhibition contains a number of corners to introduce the university, and its capabilities, faculties, programs and achievements, as well as to introduce the programs accredited nationally and internationally.

The university's pavilion also provides visitors with the opportunity to learn about the educational environment provided by the university in various disciplines for bachelor's, master's and doctoral degrees, in addition to the diversity of nationalities of students enrolled in the university, and visitors learn about the pioneering role played by the university in supporting the development of scientific research and efforts to achieve sustainable development goals.

This exhibition is an opportunity for meeting and networking between internationally accredited universities, colleges and academic institutions and between academics and students, in addition to being an interactive platform for job seekers on the one hand, and functional and professional institutions on the other.

The University Participates in the "Summer of Sight 42" Festival with More Than 90 Health, Awareness and Educational Programs

<https://www.qu.edu.sa/content/news/2586> [5]

The University, represented by the Deanship of Student Affairs, participates in the "Summer of Sight" festival, which is held in Al-Basr Park, west of Buraidah city, from 11/11/1442 AH to 18/12/1442 AH, through an awareness exhibition entitled "Belonging to a Homeland... Volunteers", which includes more than 38 student clubs from central clubs and college clubs, through which the university offers more than 90 diverse health, educational and awareness programs for festival visitors, with the aim of strengthening national identity and spreading the spirit of loyalty and belonging to the homeland.

The university's participation in the festival varies, as it includes many events offered by student clubs and central clubs, foremost of which is Vision 2030 Integrity, engineering, applied medical sciences, law, reading and science, agriculture, traffic safety, dental, design and montage, talent and innovation, volunteering, arts, accounting, media, Vision 2030, and the club for people with disabilities, where several innovations and projects are reviewed, in addition to a special exhibition on drawing, in addition to the participation of the mobile team that organizes the entry and exit chain and the application of all procedures. Precautionary inside the university exhibition.

Many diverse shows and programs are also presented daily to visitors to the festival in various fields, including health services such as measuring weight, height and body mass, introducing the correct sterilization method, and the correct method of brushing teeth, in addition to multiple participations from students with disabilities.

The university's participation in this festival comes as an extension of its previous participations, and to activate the role of students in practice, community service, and effective communication with the public, and aims to introduce the university's roles and programs that benefit all segments of society in awareness, education and strengthening national identity.

Prince of Qassim witnesses the signing of a memorandum of understanding «One Million Volunteer Hours» campaign between the university and the branch of the Ministry of Environment, Water and Agriculture

<https://www.qu.edu.sa/content/news/2919> [6]

His Royal Highness Prince Dr. Faisal bin Mishaal bin Saud bin Abdulaziz, Governor of Qassim Region, witnessed on Monday, March 27, 2023, the signing of a memorandum of understanding on the "One Million Volunteer Hours Campaign" between the university and the branch of the Ministry of Environment, Water and Agriculture in Qassim Region, and the National Center for Vegetation Cover Development and Combating Desertification in Qassim, in the presence of His Excellency Prof. Dr. Abdulrahman bin Hamad Al-Dawood, President of the University, where the agreement was signed by His Excellency the Vice President of the University, Dr. Muhammad Al-Saawi, and His Excellency the Director of the Ministry of Environment, Water and Agriculture Branch in the Qassim Eng. Abdulaziz Al-Rujaie, and Director of the National Center for Vegetation Development and Combating Desertification in Qassim, Eng. Bader Al-Nugaidan, at his office in the Emirate of the region.

This memorandum comes from the objectives of the Kingdom's Vision 2030, and in line with the launch of His Highness the Crown Prince - may God protect him - the "Green Saudi Arabia" initiative and a continuation of the successes of the initiative of His Highness the Governor of Qassim Region "Qassim Land is Green", where this partnership came to enhance the achievement of these goals and raise the percentage of vegetation, afforestation and environmental values and increase the rate of community volunteering, through mechanisms and plans that ensure the achievement of the goals set through environmental initiatives, in addition to the participation of volunteer teams and university employees and students in farming, and improving Vegetation in national parks and university facilities.

His Highness praised the objectives of the initiative, which contributes to promoting the preservation of the environment, stressing the importance of involving all government sectors and volunteer teams to make this initiative comprehensive for all those wishing to volunteer to achieve the goals of the Kingdom's Vision 2030, noting the efforts achieved in promoting the cultivation and afforestation of national parks and university headquarters, in addition to cleaning campaigns for wild parks in the region, in order to achieve one million volunteer hours for university employees.

His Royal Highness Prince Faisal bin Mishaal stressed that this partnership is one of the objectives of the Kingdom's Vision 2030, and comes in line with the "Saudi Green" initiative and a continuation of the successes of the "Qassim Green Land" initiative, and to promote the achievement of environmental goals and values and raise the percentage of vegetation and afforestation in the Qassim region.

This memorandum aims to enhance joint cooperation between the two parties, achieve integration between them and unify efforts, in order to achieve common benefits by activating volunteer work in the environmental sector through the "Make it Green" initiative to achieve the goals of the Kingdom's Vision 2030.

Through this agreement, the university and the branch of the Ministry of Environment, Water and Agriculture in the region seek to activate means of cooperation, believing that effective cooperation towards achieving the message of community partnership and mutual benefits is a national responsibility in which everyone's efforts are combined to develop and develop people and society, and achieve the vision of the country to reach a productive knowledge and scientific society.

The university team is crowned with the Saudi Universities Sports Federation Football Championship Cup

<https://www.qu.edu.sa/content/news/2918> [7]

Qassim University football team was crowned with the Saudi Universities Sports Federation Football Championship Cup for the fourth time in its history, after winning the final match yesterday evening, Tuesday, 29/8/1444 AH, over Al-Baha University team with three goals for free

The final match of the tournament was held under the patronage of His Excellency the Minister of Education,

Mr. Yousef bin Abdullah Al-Benyan, and in the presence of His Excellency the President of Qassim University, Prof. Dr. Abdulrahman bin Hamad Al-Dawood, His Excellency the President of the Sports Federation of Saudi Universities, Prof. Dr. Khalid bin Saleh Al-Muzaini, His Excellency the Vice President for Educational Affairs, Dr. Muhammad Al-Sharekh, His Excellency the Vice President for Planning, Development and Quality, Dr. Khaled Bani Al-Harbi, and His Excellency the Secretary-General of the Sports Federation of Saudi Universities, Dr. Abdulelah Al-Selwi.

The final match of the tournament, which was held at Al-Taawon Club Stadium in Buraidah, witnessed a strong rivalry between the two teams amid a large public presence, as the Qassim University team was crowned the championship deservedly after the university's high level presented throughout the two halves of the match, as Qassim University played 7 finals since the start of its participation in this tournament, of which it achieved four championships.

The University Participates with 17 Scientific Papers and 4 Lectures at the Dubai Pharmacy and Technology Conference and Exhibition (DUPHAT)

<https://www.qu.edu.sa/content/news/770> [8]

The university, represented by the College of Pharmacy, is participating in the twenty-second Dubai International Pharmacy and Technology Conference and Exhibition (DUPHAT 2018), which is held under the patronage of His Highness Sheikh Hamdan bin Rashid Al Maktoum, with the participation of 650 specialized companies, 75 universities from several countries and more than 1100 scientific researches, in addition to the participation of a number of officials and stakeholders in the pharmaceutical sector, representatives and heads of pharmaceutical associations and organizations in the region and the world.

This year, the college participates in the scientific program of the conference, and 17 students from the college participate in scientific research in the scientific poster exhibition for research, as well as 3 lectures presented by the Dean of the College of Pharmacy, Dr. Mansour Al-Sharida, Dr. Yasser Al-Moqbel, Vice Dean for Administrative Affairs, and Dr. Abdul Majeed Al-Qassumi, Vice Dean for Educational Affairs, and a lecture presented by Dr. Walid Al-Tuwayan, one of the employees of the University Medical City at the university, in addition to several lectures presented by the students of the college, and the college also holds an introductory exhibition about the college and the university and the most prominent its activities and achievements.

The college receives visitors to its pavilion with kleija, dates and Arabic coffee, which represent the popular heritage of the Qassim region, where the pavilion witnessed a wide turnout on its first day by

visitors coming from different countries of the world to participate in this scientific event, who valued the hospitality of the pavilion and expressed their admiration for the popular legacies of the Qassim region.

Dr. Abdul Majeed Al-Qassumi, Vice Dean of the College of Pharmacy for Educational Affairs, gave a scientific lecture entitled "Causes and Factors Leading to the Occurrence of Medication Errors in Hospitals", in which he talked about the most important causes and conditions that lead to the spread of medication errors in hospitals, as well as the most prominent types of these errors and their classifications.

The lecture dealt with the most important research published in this field, and concluded the lecture by reviewing the most important strategies that can be applied to reduce these errors and reduce their negative effects on patients.

Dr. Walid bin Muhammad Al-Tuwayan, one of the employees of the University Medical City at the university, gave a lecture entitled "Measuring fatigue in kidney cancer patients taking tyrosine inhibitors", in which he talked about kidney cancer, which is the seventh most common cancer in the world, and "tyrosine" inhibitor drugs and its side effects, in addition to the importance of informing patients before and during the treatment period of the effects of the drug and effective prevention methods.

For his part, His Excellency the Chairman of the Board of Directors and Director General of the Dubai Health Authority, Mr. Humaid bin Mohammed Al Qutami, visited the college's pavilion after the opening ceremony, and praised the pavilion and its introductory pillars, and the Dean of the College, Dr. Mansour Al-Shraideh, presented him with a commemorative shield on this occasion.

For his part, Al-Shraideh said that the college is participating in the conference for the fifth year in a row, pointing out that the aim of participation is to achieve the greatest benefit for the participating students through contact with academics, specialists and experts in this conference.

Al-Shraideh explained that the college's pavilion witnessed the presence and interest of visitors and specialists in the pharmaceutical field, who praised its contents of introductory brochures and display screens that presented the programs and activities of the college in particular and the university in general.

Al-Shraideh pointed out that such international and local participations come within the interests of His Excellency the President of the University, Prof. Dr. Abdulrahman bin Hamad Al-Dawood, and his endeavor to develop the university's outputs and provide students and faculty members with more experiences, science and knowledge through friction in such international forums.

The two faculties of engineering at the university conclude their participation in the Third International Conference and Exhibition for Engineers in Riyadh

<https://www.qu.edu.sa/content/news/2892> [9]

The two faculties of engineering at the university (at the main headquarters, and in Unaizah Governorate) concluded their participation in the third international conference and exhibition for engineers in Riyadh, which was held under the slogan "Engineering and the Road to 2023", organized by the Saudi Council of Engineers, through the university's pavilion, which contained a review of the most prominent engineering disciplines and student, research and innovative projects in the fields of the Internet of Things, artificial intelligence, water technologies and treatment.

The university's participating pavilion received more than a thousand visitors during the days of the conference, which was held over four days, and concluded on Thursday, March 2, 2023, where a number of college students and faculty members participated in the conference, which gave them exposure to developments in all engineering fields, and provided them with opportunities to meet with a number of specialists and experts from several government and private sectors.

The College of Nursing at the University concludes its participation in the Fifth Saudi Simulation Conference 2022

<https://www.qu.edu.sa/content/news/2840> [12]

Today, Thursday, November 10, 2022, the College of Nursing at the University concluded its participation in the Fifth Saudi Simulation Conference 2022, which lasted for five days in Riyadh under the patronage of His Excellency the Minister of Health, where the college's participation included a review of the university's efforts and the most prominent work and achievements of the college, and a comprehensive definition of it and the educational and research services it provides to students and researchers.

The college exhibition at the conference included a review of a number of innovations and inventions of the college's students and graduates, where the internship student Sarah Abdul Rahman Al-Jubailan presented an innovation aimed at using BCI technology to improve communication with people with severe intellectual disabilities, which contributes to improving the health and psychological status and following it up continuously in a short time and with high efficiency.

The college also presented the innovation of graduate Wijdan Abdul Rahman Al-Hamili, which aimed to invent the smart thermometer bracelet that helps early detection of the child's high temperature and then protects him from deteriorating his condition or complications such as convulsions, with an explanation of the importance of these inventions to visitors to the conference and the way they work, as the college's pavilion was attracted by researchers and those interested in the field of simulation and inventions.

The University Concludes its Participation in the Seventh Saudi Optical Conference

<https://www.qu.edu.sa/content/news/2830> [13]

The university, represented by the Department of Optometry at the College of Applied Medical Sciences, concluded its participation in the Seventh Saudi Optometry Conference in Riyadh, which was organized by the Saudi Optical Society over a period of 3 days and concluded its activities yesterday, Saturday, 26/3/1444 AH, where the two students, Muhammad Saad Al-Nafi, and Muhammad Fahd Al-Harbi from the Department of Optometry at the university received the best scientific research participating in the presentation sessions for students at the conference.

The university's participation came through the implementation of a number of lectures and scientific workshops, presented by faculty members at the university, in addition to the participation of a number of students in lectures and published research, and at the end of the ceremony, the university was honored for its role in the success of the conference's activities, and the shield was handed over to Dr. Sulaiman bin Abdulaziz Al-Dakhil, Head of the Optometry Department at the College of Applied Medical Sciences.

During the conference, the university also held an exhibition accompanying the College of Applied Medical Sciences that reviewed the efforts of the Department of Optometry and the Student Club, in addition to the community participations implemented by the department to serve the community, and to present a number of introductory brochures about the university in general and introduce the university's Doctor of Optometry program.

It is noteworthy that the conference witnessed the presentation of many lectures, workshops and scientific bulletins related to the specialization of optometry and optometry, in addition to an exhibition of many medical companies, and discussed a number of topics, including: examination and treatment of eye diseases, correction of refractive defects, the latest developments in severe visual impairment, diagnosis and treatment of vision problems in children, and combating visual impairment.

The University Receives the "Excellence in Innovation" Award at the "Anthology" International Conference in Dubai

<https://www.qu.edu.sa/content/news/2828> [14]

The University, represented by the Deanship of E-Learning and Distance Education, received the "Excellence in Innovation" award in the Middle East from the international company "Anthology", at its annual conference held in Dubai under the slogan "Together... Anthology Together Middle East 2022», where this global award is given to distinguished educational institutions in employing modern technologies and innovative solutions in e-learning and distance education systems, which contributed to the development of the educational process and solving obstacles to achieving its goals.

The award was received by His Excellency the Dean of E-Learning and Distance Education, Prof. Saad bin Mubarak Al-Dosari, on the sidelines of the conference that was held from 18-19 October 2022 in the United Arab Emirates, with the participation of leaders and elite officials of e-learning and distance education in Middle Eastern universities and a number of international experts in the field.

Qassim University was chosen to receive this award in recognition of its distinctive innovative contributions and solutions during the year (2022) to develop and update the e-learning system to improve the educational process and solve its obstacles, including the development of a system (follow-up statistics and issuance of virtual classroom reports), employing distance learning management system tools in implementing academic advising programs for students in university colleges, and providing electronic library services to university employees on the Blackboard system.

The university has also worked on developing electronic platforms to provide and manage various student activities, in addition to creating an electronic template for postgraduate studies, developing electronic platforms for seminars, learning forums and scientific conferences, holding discussions of the scientific research plan, discussing scientific theses (doctoral - master's), establishing distance training platforms and providing direct live (technical support) services for students and professors.

This award is classified among the international awards in the field of employing e-learning systems, and is awarded by the international company (Anthology), which is concerned with developing and supporting electronic educational systems, to distinguished universities and educational institutions that have made a significant change in their educational systems through innovative technologies, means and solutions.

This award aims to support outstanding innovative practices in the field of e-learning worldwide by analyzing and studying the practices and experiences of a large number of universities, and selecting and honoring the best of those experiences during the year.

The conference discussed global trends in the field of e-learning systems, trends and challenges affecting this, sharing the best e-learning practices at the level of universities in the region, in addition to the efforts of universities in activating e-learning and reviewing successful experiences.

[HRH Prince Faisal bin Mishaal congratulates the University on winning two medals at the Geneva International Exhibition of Inventions](https://www.qu.edu.sa/content/news/2738)

<https://www.qu.edu.sa/content/news/2738> [15]

His Royal Highness Prince Dr. Faisal bin Mishaal bin Saud bin Abdulaziz, Governor of Qassim Region, congratulated the university on the occasion of winning two medals (gold and silver) at the Geneva International Exhibition of Inventions, among more than 750 innovations from 25 countries that participated in the exhibition, expressing his pride and pride in the achievements that the university used to achieve in various local and international events and forums.

His Highness thanked all the university's employees, led by His Excellency Prof. Dr. Abdul Rahman bin Hamad Al-Dawood, President of the University, for their efforts to improve the educational, research and service process at the university, especially in the field of innovations and scientific research and the university's advanced scientific levels, appreciating those efforts that contributed to the quality of the university's scientific outputs and their achievement of advanced positions in local and international forums.

The College of Nursing at the University concludes its participation in the Fifth Saudi Simulation Conference 2022

<https://www.qu.edu.sa/content/news/2840> [12]

Today, Thursday, November 10, 2022, the College of Nursing at the University concluded its participation in the Fifth Saudi Simulation Conference 2022, which lasted for five days in Riyadh under the patronage of His Excellency the Minister of Health, where the college's participation included a review of the university's efforts and the most prominent work and achievements of the college, and a comprehensive definition of it and the educational and research services it provides to students and researchers.

The college exhibition at the conference included a review of a number of innovations and inventions of the college's students and graduates, where the internship student Sarah Abdul Rahman Al-Jubailan presented an innovation aimed at using BCI technology to improve communication with people with severe intellectual disabilities, which contributes to improving the health and psychological status and following it up continuously in a short time and with high efficiency.

The college also presented the innovation of graduate Wijdan Abdul Rahman Al-Hamili, which aimed to invent the smart thermometer bracelet that helps early detection of the child's high temperature and then protects him from deteriorating his condition or complications such as convulsions, with an explanation of the importance of these inventions to visitors to the conference and the way they work, as the college's pavilion was attracted by researchers and those interested in the field of simulation and inventions.

University Students at World Defense Show in Riyadh

<https://www.qu.edu.sa/content/news/2712> [16]

University students visited the World Defense Show, which was held in the capital, Riyadh, as part of the "Future Talents" program, where "25" students from various faculties of the university visited the exhibition, which is considered an interactive platform that brings together the defense industry system in the whole world in one place.

The visit included a tour of the university's student delegation on the various corners of the exhibition and getting acquainted with the latest systems used in the field of defense, and the latest defense products that focus the joint integration between air, land and sea defense systems, information security and satellites.

The visit aims to motivate male and female students to engage in the field of innovation and encourage them to be effective producers in this generous country, to contribute, through the exhibition and others, to achieving the goals of the Kingdom's ambitious Vision 2030 aimed at economic diversification, developing national competencies, and raising awareness among students in all aspects.

The University Participates in the Riyadh International Book Fair 2022

<https://www.qu.edu.sa/content/news/2815> [17]

The university, represented by the Deanship of Library Affairs, is participating in the Riyadh International Book Fair 2022, which began its activities last Thursday and will continue until next Saturday, the eighth of October, where the university displays its publications of journals and scientific research in pavilion No. (H65).

The pavilion contains the university's scientific publications that cover various disciplines, including forensic sciences, agriculture, veterinary medicine, economics, management, education, linguistics and other sciences and knowledge, and the pavilion also contains separate numbers of refereed scientific journals issued by the university's faculties and research and scientific centers.

The university's publications are of interest to researchers from faculty members in various universities, graduate students, as well as those interested in the fields of science, knowledge and applied research, as the university's pavilion within the exhibition includes more than 200 books of faculty members at the university, in addition to the publications of research chairs and scientific journals.
